

Subjects index / Predmetno kazalo

– vol. 63/2014.

- Alcohol – high level of education, health diet and moderate consumption of alcohol are associated with lower odds for first-ever ischemic stroke in hospital based case-control study in Varaždin County, Croatia 73
- Allopurinol treatment prolonged – two cases of polyneuropathy, microcytic anemia and copper deficiency 87
- Anemia microcytic, polyneuropathy and copper deficiency after prolonged allopurinol treatment – two cases 87
- AntiGQ1b syndrome – diagnostic challenge: differential diagnosis between Miller Fischer syndrome and Bickerstaff's brainstem encephalitis 83
- Celiac disease – a rare neurological presentation 41
- Copper deficiency, polyneuropathy and microcytic anemia after prolonged allopurinol treatment – two cases 87
- Editorials 5, 71
- Education high level, health diet and moderate consumption of alcohol are associated with lower odds for first-ever ischemic stroke in hospital based case-control study in Varaždin County, Croatia 73
- Encephalitis and small cell lung cancer – posterior reversible encephalopathy syndrome in a patient 35
- Encephalitis brainstem Bickerstaff's – the diagnostic challenge of antiGQ1b syndrome: differential diagnosis between Miller Fischer syndrome 83
- Encephalitis – two limbic encephalitis cases with potassium channel antibodies 47
- Encephalopathy syndrome posterior reversible in a patient with paraneoplastic extralimbic encephalitis and small cell lung cancer 35
- Fibromyalgia – neurotoxin-induced after ciguatera (filapia fish) poisoning 55
- Head trauma – old calcified bilateral subdural hematoma in a patient 99
- Hypotension spontaneous intracranial 97
- Letter to the Editor 71
- Malformation arteriovenous – trigeminal neuralgia first sign 103
- Migraine vascular considering new diagnostic criteria 11
- Multiple sclerosis – is complementary and alternative medicine evidence based? 19
- Multiple sclerosis – neuroborreliosis: diagnostic problems in distinguishing from MS 29
- Multiple sclerosis – severe relapse after stopping natalizumab for multiple sclerosis 63
- Multiple sclerosis – tongue somatosensory evoked potentials 5
- Natalizumab – severe relapse after stopping natalizumab for multiple sclerosis 63
- Neuralgia trigeminal: the first sign of arteriovenous malformation 103
- Neuroborreliosis: diagnostic problems in distinguishing from multiple sclerosis 29
- Neurotoxin-induced fibromyalgia after ciguatera (filapia fish) poisoning 55
- Nystagmus outbeat due to medullary lesion: case report and literature review 91
- Poisoning – neurotoxin-induced fibromyalgia after ciguatera (filapia fish) poisoning 55
- Polyneuropathy, microcytic anemia and copper deficiency after prolonged allopurinol treatment – two cases 87
- Potassium channel antibodies – two limbic encephalitis cases with potassium channel antibodies 47
- Reviewer's index for volume 63/2014 109
- Stroke first-ever ischemic in hospital based case-control study in Varaždin County, Croatia – high level education, health diet and moderate consumption of alcohol are associated with lower odds in hospital based case-control study in Varaždin County, Croatia 73
- Subdural hematoma old calcified bilateral in patient after head trauma 99

Syndrome Miller Fischer and Bickerstaff's brainstem encephalitis – differential diagnosis between. The diagnostic challenge of AntiGQ1b syndrome 83

Tongue somatosensory evoked potentials in multiple sclerosis 5

Wine glass' sign 101
